æ Cost or other basis provided may include adjustments including but not limited to: dividend reinvestment, return of capital/principal, wash sale loss disallowed, amortization, accretion, acquisition premium, bond premium, market discount, market premium, and option premium.

þ The following pieces of information are not reported to the IRS for "Not Provided" tax lots: Date of Acquisition (1b), Cost Basis (3), Wash Sale Loss Disallowed (5), and Term (8)

z Totals of Cost or Other Basis include all tax lots with known basis (both "provided" and "not provided"). Totals do not include tax lots with unknown basis.

Amortization, accretion, and similar adjustments to cost basis are not provided for short-term instruments, unit investment trusts, or securities of foreign issuers.

For securities bought in a foreign currency, we have provided estimated cost basis in United States Dollars (USD) by converting the foreign currency cost into USD based on exchange rates on the trade date of the purchase. For securities sold (or redeemed) in a foreign currency, we have provided the USD proceeds by converting the foreign currency proceeds into USD based on exchange rates on the trade date of the sale. If you acquired the foreign currency cost, or sold the foreign currency proceeds in exchange for USD in a separate currency transaction linked to the security transaction, then the trade date exchange rate we used is the spot rate at the time of the linked currency transaction. Otherwise, the trade date exchange rate we used is the end-of-day exchange rate. For tax reporting purposes, you may be required to determine your actual USD cost basis, proceeds, and gain/loss based on the exchange rates on the settlement dates of the applicable transactions. Consult your tax advisor for more information.

* This is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if this income is taxable and the IRS determines that it has not been reported.

FORM 1099-B*

2011 Proceeds from Broker and Barter Exchange Transactions

Copy B for Recipient OMB NO. 1545-0715

We are required to convert a purchase or sale in foreign currency into its United States dollar (USD) equivalent at the time of the transaction and to use that USD equivalent amount as the cost basis or gross proceeds as applicable. For securities directly bought or sold in a foreign currency in a single transaction in your account, we have converted the foreign currency into USD on the trade date of the purchase or sale using the end-of-day exchange rate. If you acquired the foreign currency cost, or sold the foreign currency proceeds in exchange for USD in a separate currency transaction linked to the security transaction, the conversion was made using the spot rate at the time of the linked currency transaction. In some cases, you may be required to use different currency conversion conventions than those applied here.

Certain tax rules may require you to treat as ordinary income/loss all or a portion of your realized gain/loss from any debt instruments that are denominated in a currency other than U. S. dollars (USD) or that make a payment calculated by reference to the value of a currency other than USD. Consult your tax advisor for more information.

* This is important tax information and is being furnished to the Internal Revenue Service. If you are required to file a return, a negligence penalty or other sanction may be imposed on you if this income is taxable and the IRS determines that it has not been reported.

1099-OID: ORIGINAL ISSUE DISCOUNT (OMB NO. 1545-0117)

Original issue discount (OID) is the excess of an obligation's stated redemption price at maturity over its issue price (acquisition price for a stripped bond or coupon). OID is taxable as interest over the life of the obligation. If you are the holder of an OID obligation, generally you must include an amount of OID in your gross income each year you hold the obligation. Obligations that may have OID include a bond, debenture, note, certificate, or other evidence of indebtedness having a term of more than one year. For example, the OID rules may apply to certificates of deposit (CDs), time deposits, bonus savings plans, and other deposit arrangements, especially if the payment of interest is deferred until maturity. In addition, the OID rules apply to Treasury inflation-protected securities. See **Pub. 550, Investment Income and Expenses**, for more information. If you bought or sold an obligation during the year, and you are the owner of that obligation, but you did not receive a Form 1099-OID, you are not required to issue or file Form 1099-OID showing the OID or stated interest allocable to the seller/buyer of the obligation.

1. **Original Issue Discount for 2011**—Shows the OID on the obligation for the part of the year you owned it. Report the amount on line 1 as

IMPORTANT TAX INFORMATION

Your 2011 Corrected Tax Reporting Statement

Fidelity Investments is committed to sending accurate tax information to you and to the IRS. We have been informed of a change in the information we reported on the 2011 Tax Reporting Statement we previously sent you. As a result, we are enclosing a corrected Tax Reporting Statement. If Fidelity was required to report the original information to the IRS, then we have also informed the IRS of the change, as required by law. Use the information reported on your corrected statement to complete your tax returns.

Here are answers to some frequently asked questions about a corrected tax statement, which you may find helpful.

FREQUENTLY ASKED QUESTIONS

Why have you sent me a corrected Tax Reporting Statement?

Whenever the tax information Fidelity reported to you and to the IRS changes, we are required to send corrected tax information to you and to the IRS. As a result, we are sending you a corrected tax statement, which includes any changes in previously reported income data, as well as changes to certain other items, such as your name, address, or tax identification number. As a customer service, Fidelity also sends a corrected Tax Reporting Statement to inform you of changes to the data in the Supplemental Information pages of your statement. We do not report this supplemental information to the IRS.

How do I distinguish the corrected Tax Reporting Statement from the original one I received?

It is marked "CORRECTED," with the date it was corrected, in the upper right section of the first page. This is the date of the last correction we made to your statement. The heading of the specific section that we corrected is also marked, Corrected, with the date of that specific correction.

Does this corrected Tax Reporting Statement replace, in its entirety, the previous statement I received?

Yes, it replaces the entire statement that we previously sent.

How can I tell what has changed on my corrected statement?

On both the Tax Reporting Statement and in the Supplemental Information, we mark any change to a dollar amount with a "C." We mark changes in the supplemental Realized Gain/Loss sections with a "C" for the entire position, rather than for each separate transaction. Changes to name, address, or tax identification number, initiated by you, are not marked.

Why didn't you report this sooner?

Fidelity makes every effort to receive and report information in a timely manner. Our goal is to present all information correctly on your original Tax Reporting Statement. Unfortunately, most of these corrections are due to new and/or revised information Fidelity received, after we prepared your original statement, from other regulated investment companies (also known as mutual fund companies), real estate investment trusts (REITs), unit investment trusts, mortgage pools, or other issuers of securities.

What kind of corrections are most common?

The most common kinds of corrections Fidelity reports are corrections for the reclassification of dividends from mutual funds, REITs, mortgage pools, and unit investment trusts; changes in the rate of distribution per share; or the addition of foreign tax to a portion of a distribution. A reclassification is a change in the classification of some reportable income data or other distribution. For example, some non-qualified dividends might be reclassified as qualified dividends.

Is this the only corrected Tax Reporting Statement that I am going to receive?

Unfortunately, there is no way that we can answer this question, since we do not have control over when other companies may send us corrected information. Your Tax Reporting Statement, including the most recent corrections, is viewable on [Fidelity.com](https://www.fidelity.com).

How do I view my tax statement online?

Go to [Fidelity.com](https://www.fidelity.com) and log in. At the Portfolio Summary, choose Statements/Records, and then choose Tax Forms. You will see the date the statement was corrected at the top right of the statement. All corrected dollar amounts are also marked online with a "C."

I have already filed my tax returns. Must I file amended returns?

That will depend upon the corrected item, and on your individual tax situation. Certain corrections may change the classification of your dividends; other corrections may affect your gains, losses, and/or basis in an investment. Such corrections may have an impact on your adjusted gross income, deductions, and eligibility for certain tax credits. We suggest you consult your tax advisor to determine how the correction should be reported and how it may affect other items on your tax return.
